Best Kitchen & Bath Products of 2019

Architectural Record presents the best functional, smart, and accessible kitchen & bath products of 2019.

HI-TECH BLUETOOTH MIRROR

Strasser has integrated a Bluetooth-enabled sound system into its latest bath mirror. A touchscreen control on the reflective surface allows users to listen to news or music during their daily routines. Available in three sizes (48" x 36", 24" x 36" and 36" square), the mirror incorporates make-up lighting, from 2700K to 4000K, and a defogging feature.

“The innovation behind the Hi-tech Mirror isn’t just technology for technology’s sake—it gives you access to digital tools that have become an important part of everyday life.”

~Peter Ollestad, Vice President of Sales
