STRASSER INTRODUCES TWO NEW MEDICINE CABINET COLLECTIONS

The aluminum LED and solid wood designs are made to coordinate with the manufacturer's existing bath vanities.

By [Mary Salmonsén](#)

In response to customer requests for more medicine cabinet storage, Strasser has unveiled two new medicine cabinet collections—made from solid wood or aluminum with LED lights—designed to coordinate with the manufacturer's existing luxury bath vanities.

"Medicine cabinets really are the perfect bath storage solution for everything from medications to moisturizers," says Peter Ollestad, Strasser's vice president of sales. "They keep everything at eye level for easy organization with a clean look. Plus, our cabinets with LED lighting help with hair, makeup, and shaving routines, making mornings much easier."

The solid wood cabinets are available in a choice of four sizes—20, 24, 30, and 36 inches—each with its own configuration of open glass shelving. The cabinet door features a mirror on the inside and outside, and the full cabinet is available in all 17 of Strasser's wood finishes.

The aluminum cabinet series is available in 24- or 36-inch sizes, and also features mirrors on both sides of the door, as well as the inside of the cabinet unit. The cabinet includes both electrical and USB outlets, and offers LED

Pricing for the new medicine cabinets starts at \$900 for the 20-inch solid wood cabinet. All products are manufactured in the USA. strasserwood.com.
