

Specification Sheets for ICON 2030 Wall Mirror

SPECIFICATION VARIANCES

Dimensions on finished mirrors may vary slightly from those shown on these specification sheets due to variability in construction materials.

Our products are engineered to maintain close dimensional tolerances but variability in manufacturing materials can change dimensions slightly (normally within $\pm 1/8$ " but occasionally up to $\pm 3/16$ ").

In most applications these slight variations will have no impact upon installation, appearance or function. However, when planning and finishing a space for a built in mirror, **do not frame or finish the space before measuring the actual mirror!**

We can not be responsible for any expenses incurred as a result of the end user or contractor not following this guideline.
