UPGRADE - IN-COUNTER CHARGING

Wireless Charging Information Guide

Powered by FreePower

INSTALLATION RESOURCES

In-Counter Wireless Charging Upgrade

STRASSER

IMPORTANT

An outlet is required behind the vanity.

Install a standard 110V outlet on the right side of the wall, directly behind the vanity. The charger plugs in here.

INSTALLATION STEPS

01 Install a 110V outlet on the right side, behind the vanity

02 Install the vanity

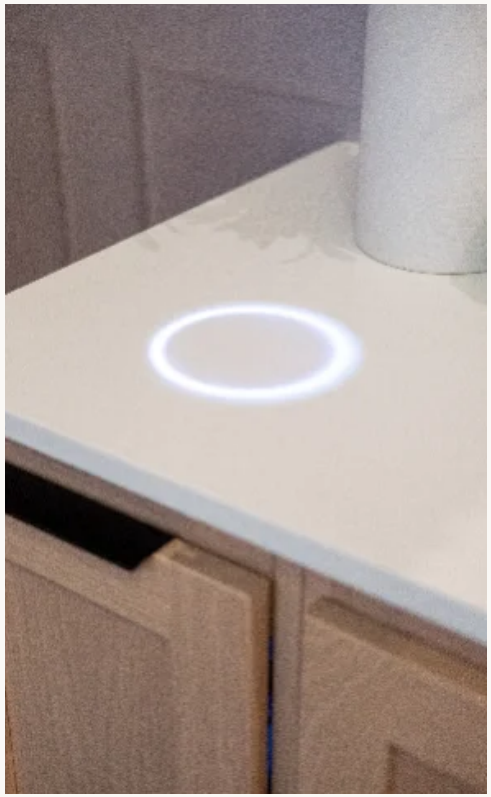
03 Plug in the FreePower charger

CHARGING HALO

A soft light marks the charging zone. Adjust its color and brightness, and receive firmware updates, in the FreePower app (iOS and Android).

TECHNICAL SPECS

Charger	FreePower 1 Device
Devices	1
Charging rate	Up to 15W
Outlet	110V, one receptacle
Max power draw	65W
Standard	Qi wireless
Placement	Free position



NOTE Power goes only to chargeable devices. Keys and other items can rest on the surface.

COMPATIBLE DEVICES

Apple iPhone	iPhone 8 and newer, all sizes
Samsung Galaxy	S6 and newer, including Note series
Google Pixel	Pixel 3 and most newer (not Pixel 4a)
Apple AirPods	2019 and later, all AirPods Pro (wireless case)
Galaxy Buds	Most models (wireless case)

Any Qi-enabled device will charge. Most smartwatches use proprietary chargers and are not compatible. Some phone cases can block charging.
